Varun K S

AI Engineer

AI engineer who builds LLM applications for messy, real-world problems: RAG pipelines, agentic systems and conversational AI, with additional depth in computer vision. Winner of Smart India Hackathon 2024 and a top 2% national finalist at the India AI Impact Buildathon. Currently interning as an AI engineer at Rapdfly.

EXPERIENCE

AI Engineering Intern, Rapdfly 2026 - Present

- Work on AI features and release builds for Rapdfly products, including the VinoVault app.
- Rebuilt the company website, with scroll-driven product storytelling and working lead forms.

SELECTED PROJECTS

Dhurvam AI honeypot for scam intelligence — Top 2% nationally, India AI Impact Buildathon 2026

- Detects scam messages, replies as a believable victim using LLM-driven dialogue, and keeps the scammer engaged.
- Extracts actionable intelligence from each conversation: payment IDs, phone numbers, links and scripts.

LangChain, Ollama, FastAPI, Redis

GLOF Early Warning System Flood prediction for glacial lakes — Winner, Smart India Hackathon 2024 (DRDO)

- Led the ML work: XGBoost anomaly detection on live IoT telemetry (water level, temperature, ground motion, pressure, flow).
- Trained CNNs on Sentinel-1 SAR imagery to flag early lake changes through cloud cover; alerts go out by SMS and a live dashboard.

XGBoost, TensorFlow, FastAPI, React, ESP32, LoRa, Twilio

Samudra (FloatChat) Conversational ocean data platform

- Lets users ask plain-language questions over ARGO float data and get answers and charts straight from NetCDF profiles.

Gemini, LangChain, Pandas, Streamlit

Aran Local vulnerability report generator — Finalist, Israel-India Global Innovators Hackathon

- Generates structured vulnerability reports with fully local inference, so sensitive scan data never leaves the machine.

Ollama, Llama 3, FastAPI

Solace AI mental health companion

- Reads sentiment and keeps conversational memory to give empathetic, context-aware replies.

Gemini, LangChain, Node.js

SKILLS

LLMs and AI engineering
LLM application development, RAG pipelines, LangChain, prompt engineering, agentic systems, LLM inference (local and API)

AI and ML
Machine learning, deep learning, NLP, computer vision

Frameworks
TensorFlow / Keras, scikit-learn, XGBoost, OpenCV, PyTorch

Languages and tools
Python, SQL, C, n8n (workflow automation), Git

Soft skills
Team leadership, communication, research and documentation

ACHIEVEMENTS

Winner, Smart India Hackathon 2024

Top 2% nationally, India AI Impact Buildathon, HCL GUVI (2026)

Finalist, Israel-India Global Innovators Hackathon

EDUCATION

B.Tech, Artificial Intelligence and Machine Learning
Bannari Amman Institute of Technology, Coimbatore, 2022 - 2026

CERTIFICATIONS

Google Cloud: Introduction to Generative AI, Introduction to Large Language Models, Transformer Models and BERT
